[2633] ——— **ARMSTRONG (John). The Art of Preserving Health:** a Poem.

*FIRST EDITION.* 4to. *Unbound.*

London, A. Millar, 1744.

£1 15s

Title, B—S<sub>3</sub>, in fours. With price on title-page.

Armstrong's masterpiece. In the class of poetry to which it belongs, the "Art of Preserving Health" holds a distinguished place. No writer of the eighteenth century had so masterful a grasp of blank verse as is shown in parts of this poem. The powerful passage descriptive of the plague has been highly praised.

[2634] ——— **BAYNARD (Edward). Health,** a Poem. Shewing how to Procure, Preserve, and Restore it. To which is annex'd, the Doctor's Decade.

[2663] ——— **MEAD** (Richard). **A Short Discourse concerning Pestilential Contagion,** and the Methods to be used to Prevent it.

Large Paper. 8vo. *Full contemporary morocco, gilt back and sides, g.e.*

London, Sam. Buckley, 1722.

£2 15s

The best edition, greatly enlarging previous editions.

The book is lucid and interesting; and everyone could understand it, and it was effective in allaying the public alarm. The practical conclusion at which the author arrives is in accordance with the views held by all sanitary authorities at the present day, and is, that the isolation in proper places of the sick, is more effectual in checking the progress of an epidemic than a general quarantine, or than measures of fumigation."

[2664] ——— **Observations on the Baume de Vie,** first discovered by Mr. Le Lievre, the King's Apothecary at Paris. Wherein all the Objections made to it by the Ignorant and Interested, are fully Refuted, and its wonderful efficacy in a Variety of Diseases, justified on the most reasonable Principles.

London, Thomas Trye, 1747.

£16 16s

Interleaved throughout, with very numerous MS. notes in the hand of T. Cook.

Twenty-three editions were published during Wesley's lifetime, each revised and corrected by the author.

This book, which Wesley affirms, "comes nearest an Universal Medicine of any known in

**Medical: Wesley (John): Primitive Physick—continued.**

the World," has excited the mirth of many persons by the curious nature of some of the remedies recommended. It consists of 725 receipts for 243 of the various ills to which the flesh is heir. Whatever may be said of the remedies, the advices on cold-bathing and the witty and sagacious preface deserve to be read and pondered, especially the "few plain, easy Rules" on the preservation of the health, which are chiefly transcribed from Dr. Cheyne.

[2691] ——— **WILLIAM III. A Particular Relation** of the Sickness and Death of his late Majesty K. William the Third.

[2692] ——— **WITHERING** (William). **An Account of the Foxglove**, and Some of its Medical Uses: with Practical Remarks on Dropsy, and other Diseases.

*With large folding plate of the Foxglove.*

THE RARE FIRST EDITION. 8vo. *Half calf (old style).*

Birmingham, M. Swinney, 1785.

Presentation copy from the author, inscribed on the title:—

"M. Ward, from the Author."

(Unfortunately this inscription has been cut into).

A pharmacological classic of the utmost importance, being the first book to recommend the use of the Foxglove in heart diseases, a remedy which is now generally accepted, but which is the time of its publication met with considerable opposition, especially from Lettsom. Withering's work was incidentally a protest against the abuses of digitalis, which were already creeping in.
